THE ' White Diamond Minstrels' of H.M. Leander, at present in dock at Hunghom, gave a concert in an extemporised hall in the Dockyard last night. There was a large audience including the officers of the ship, the officials of the Dockyard and ship's company, The first part of the programme consisted of the usual assortment of comic and sentimental songs, with jokes by the corner men. There was some clever step-dancing and comic singing in the second part, which was brought to a close with a laughable sketch. All the diamonds' acquitted themselves most commendably, and were accorded a hearty stipation. Made only in London. Capital of the Company,... \$150,000 From the above Statement it will be seen that the Company pays the Old Company (in shares) considerably less than their out-

lay for the purchase of the properties and It is believed that the properties above-

mentioned contain very valuable minesthis belief being based on the following (c). The favorable reports which have from

time to time been made on the property by Mesers Cox and Seaver, and Mr HENDERSON, independent mining experts of good standing and repute in Australia. Extracts from these reports accompany the Prospectus, and the reports themselves, together with Plans of the properties, are open to inspection at the Office of the Liquidator, No. 1, Duddell Street, Hongkong. From these and from the Extracts from the report of Mr CARL WILHELM GEORG, the Liquidator of the Old Company, it appears that there is a consensus of opinion, on the part of those acquainted with the facts, that these are valuable mining properties.

(b). Gold to the value of £100,000 has been taken out of these properties and the mines by sinking deep shafts.

(c). The mines when worked by tributers (i. a., a few miners who from time to time have leased the right to work) have from about 1,500 to 2000 tons of stone, and within the past 12 months tributers considerable quantities yielding from a signed at less than \$2, and Parcels should at the tributers will not interfere with the ment. sinking of shafe and development of the property and their right of tribute will expire in September 1894.

(d). In parts of the Balmoral property the reef has yielded as much as 4 oz. to 7 oz. per ton, and it is confidently expected that, with certain necessary expenditure in sinking and driving and in the purchase of additional machinery, these

properties will turn out gold in very paying quantities. (c). The Government of New South Wales have promised \$100 towards shaft sinking on the Balmoral property, and the Government Prospecting Board described

the Queen of the Mount as a splendid (f). On the Queen of the Mount property, Mogul...... Tnesday March 20.

in 1892, 429 tons yielded 450 oz. to Victoria...... Tuesday | April 10.

Both these properties and the Eureka property are more fully referred to in the extracts from Reports which accompany the Prospectus.

It is believed that the want of success of the Old Company was due to the gross mismanagement, ignorance and waste of money at the Mines. The present Comperry intend to secure the services of a business manager from Hongkong in whom the shareholders will have confidence and whose head-quarters will be at the mines and under whose management the money of the Company will be applied honestly

the properties. Prospectures and Forms of Application for Shares can be obtained on application to the Hongkong and Smanghat Banking CORPORATION, OF from the STOCKBROKERS' AMOCIATION OF HONGKONG.
